Please amend the present application as follows:

__Claims__

The following is a copy of Applicant's claims that identifies language being added with underlining ("___") and language being deleted with strikethrough ("————") or brackets ("**[[ ]]**"), as is applicable:

1.   (Currently amended) A method for facilitating pay printing, the method comprising:

a network-based imaging service storing a scaled-down version of a full-sized document in a personal imaging repository of a user;

a network-based printing service separate from the imaging service receiving a print request from the user;

the printing service automatically identifying the personal imaging repository and automatically retrieving via a network the scaled-down version of the full-sized document from the personal imaging repository;

the printing service receiving print option selections from the user; ~~and~~

the printing service determining printing costs for printing the full-sized document based upon attributes of the scaled-down version; and

<u>displaying the determined printing costs to a user on a display device</u>.

2.   (Previously presented) The method of claim 1, wherein the personal imaging repository comprises a graphic store and a composition store.

3.   (Previously presented) The method of claim 1, wherein the personal imaging repository is associated with an imaging source with which the full-sized document is created or identified.

4-6.   (Canceled)

7.   (Previously presented) The method of claim 1, wherein the scaled-down version comprises one or more thumbnails that represent document pages.

8-10.   (Canceled)

11.   (Previously presented) The method of claim 1, wherein receiving print option selections comprises receiving selections with a web site of the network-based printing service.

12.   (Previously presented) The method of claim 11, wherein the printing service is supported by a printing device having an embedded server.

13.   (Previously presented) The method of claim 1, wherein the determination of the printing costs is dependent upon attributes of the scaled-down version and the option selections.

14-30.   (Canceled)

31.   (Previously presented) The method of claim 1, wherein determining printing costs based upon attributes of the scaled-down version comprises determining printing costs based upon toner or ink coverage.

32.   (Previously presented) The method of claim 1, wherein determining printing costs based upon attributes of the scaled-down version comprises determining printing costs based upon the amount of time that printing will require.

33.   (Previously presented) The method of claim 1, further comprising the printing service, responsive to the print request, downloading content to a user's network browser of the user, the content including generic access instructions that call on an imaging extension of the network browser to access the personal imaging repository.

34.   (Previously presented) The method of claim 33, wherein the imaging extension of the network browser comprises application programming instructions (APIs) and wherein the call comprises an API call.
